

The Kings County Fire Department provides fire safety inspections for persons providing in-home day care or foster care for more than six children. Upon receipt of the 850 form from Community Care Licensing, the department will contact the day care provider and set an appointment to inspect the home. Foster families who have been told by the Department of Social Services that they need an inspection may contact the Fire Marshal at 559-852-2885. A link with detailed requirements can be found on the main Fire Prevention page.

There is a \$95.00 charge for this inspection and one re-inspection, if required. Subsequent inspections will incur additional fees. Please note that these inspections can only be conducted in the unincorporated areas of the county, as well as in the cities of Avenal and Corcoran. Residents in Hanford or Lemoore must contact their respective fire departments.
